Gameplay

In order to beat a level, the player must make it through all the stages and the boss battle with just 3 lives. If you survive a stage for 30 seconds, you'll be advanced to the next one. Completing two stages will grant a checkpoint; if you die, you'll be sent back to the previous checkpoint. You're allowed to use checkpoints 4 times per attempt. Every stage is a different pattern that must be learned and overcome.

English

Wow. After several attempts I was eventually able to get a non-zero score. Disappointed to see there's no achievement for that. (Given that I did complete the tutorial I don't think the achievements are working, but I don't think that will affect me much). It's clearly a labour of love with high production values (if you appreciate careful minimalism), but it's apparently aimed at people who think Super Hexagon is for wusses. So I recommend it, but only if you are such a person.
